

Albany Bulb/Neck Emergency Access
City of Albany
March 19, 2008

Description: The proposed project will restore and enhance emergency access roads along the Albany Bulb and Neck. As made evident by the recent Cosco Busan oil spill, access roads within this vicinity have been overgrown with vegetation, and roads have been degraded. The City of Albany took the initiative to implement this project immediately following the oil spill in order to ensure adequate emergency access to the area was developed. Emergency access will allow for re-grading of the roadways and minor removal of vegetation to ensure emergency vehicles have safe passage within the area should emergency services be necessary.

Costs for emergency access improvements are currently estimated at \$60,000. Because this work is being done as a result of the Cosco Busan oil spill, the City is seeking reimbursement for this work. At present no contract has been entered into, however work is expected to begin by mid-April (includes brush clearing, road maintenance).

Benefits: This project will help ensure adequate accessibility to any area along the waterfront in case of an emergency. Secondly, improving the emergency access roadways will allow a recreational opportunity for park users wishing to utilize a trail-type system within the area.
