Subject: Contract award for tennis court resurfacing at Jewel's Terrace Park
From: Penelope Leach, Assistant City Manager/Community Services Director

RECOMMENDATION

That Council authorize the City Manager to enter into a contract with First Serve for the resurfacing of the tennis courts at Jewel's Terrace Park not to exceed \$35,000.

BACKGROUND

Resurfacing the tennis courts at Jewel's Terrace Park is identified in the City's Capital Improvement (CIP) Plan.

DISCUSSION

The surface is in serious need of repair. Tree roots pushing up the surface are creating bumps and crevices and the surface is cracking, fading, and peeling. It is important to move forward with the tennis court resurfacing as waiting any longer will cause the courts to deteriorate further resulting in higher costs for repair. Resurfacing tennis courts is a normal part of maintenance and dramatically increases the lifespan and playability of a courts.

SUSTAINABLILITY

Having the tennis courts in good repair encourages use which in turn promotes health and wellness.

FINANCIAL IMPACT

Including a 10% contingency and project management costs, the project will not exceed \$35,000 from Measure F 2002.
