

## **Speeding Survey on the 500 Block of Carmel Avenue**

---

A speed survey was conducted on the 500 block of Carmel Avenue for 7 days from Friday, November 16 to Friday, November 23, 2012 at the written request of a resident of this block. The results of the survey are portrayed in the following table:

### **500 Carmel-2012**

Average Daily Traffic Volume	468 vehicles
Average Speed	20.6 mph
85 <sup>th</sup> Percentile	25.3 mph
Maximum Speed	40 mph

The results of the survey do not show consistent speeding according to the 85<sup>th</sup> percentile as stated by the current City of Albany Traffic Calming Policy (which states that consistent speeding is determined by the 85<sup>th</sup> percentile measured at 30 mph or more). The survey measured the 85<sup>th</sup> percentile speed within the five-mile threshold above posted speed limit of 25 mph.
