

### **Small-volume trash containers: 10-gallon *micro-cans***

1. Are you a City of Albany Resident?
2. Do you use both your recycling (gray cart) and organics (green cart) regularly?
3. Is your trash container never quite full?
4. Would you like to save some money on your Waste Management bill?

### **IF you answered YES to the above 4 questions...**

You may qualify for a small-volume trash container also referred to as a "*micro can*".

The "*micro can*" is a 10-gallon container specifically for those residents that have a limited amount of trash because they properly utilize their recycling and organics/food scraps containers.

The "*micro can*" is a cost-savings reward for residents that choose to recycle and participate in the City's organics program.

**For more information, and a "*micro can*" application, contact:**

**Waste Management of Alameda County at 510.613.8710**

*Please note: "micro cans" are only available to single family residential customers. Use of a "micro can" is allowed only for single-family residents that demonstrate ongoing participation in both recycling and organics programs to ensure that garbage is not being improperly disposed of.*
