Email: alex.coates@ebmud.com
Subject: East Bay Regional Communications System

Dear Mr. Coates,

The East Bay Municipal Utility District (EBMUD) and the East Bay Regional Communications System Authority (EBRCSA) have been partners since 2007 when we began to build a Public Safety Radio System which is referred to as the “System of Systems”. The Radio System allows Law Enforcement, Fire, and Emergency Service providers to seamlessly communicate within Alameda and Contra Costa County. We appreciate the partnership, which began with General Manager, Dennis Diemer, and has continued over the years as the system was built and began operation in May of 2013. The system covers both counties from 31 strategically located transmission sites throughout Alameda and Contra Costa County. Three (3) of the sites are on property owned by EBMUD; Alta Mesa, Pearl, and Seneca. We are very fortunate that EBMUD and the Counties and Cities in Alameda and Contra Costa have committed resources to ensure the system provides interoperability to all member agencies.

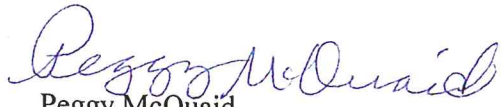

As EBMUD prepares to become a member of EBRCSA, I write to you concerning a change to the agreement, and the sites EBMUD has provided: Alta Mesa, Pearl, and Seneca. We designed and built our radio system incorporating these locations, which EBMUD has provided at no charge to EBRCSA. The three sites are critical to the radio coverage provided by EBRCSA. However, EBMUD has proposed an annual reoccurring charge of \$35,000 per site for a total of \$105,000, which will pay for their subscription to EBRCSA and offset the cost of equipment necessary such as dispatch consoles, radios, and antenna, for EBMUD members to utilize the system.

Historically, members of EBRCSA have all provided infrastructure such as microwave, towers, and shelters absorbing the cost themselves. With this proposed agreement, EBMUD will be the only agency charging EBRCSA for the areas with equipment in place.

The original business plan of EBRCSA was designed on the agreement that each member agency would provide what resources they had at no charge to ensure the operating costs for the system remain the lowest possible for every member agency. EBMUD’s proposed annual charge of \$105,000 per year changes that business model, potentially opening the door for other agencies to

charge for the infrastructure they have been previously providing, thereby increasing the monthly cost for every member of EBRCSA.

Sincerely,

A handwritten signature in blue ink that reads "Peggy McQuaid". The signature is written in a cursive style with a large initial "P".
