

# Business Rebate Form

## The Business Rebate

The California Green Business Network (CAGBN), in partnership with the California Environmental Protection Agency, has rebates available to assist businesses with updates and upgrades that are required to become a Certified Green Business. Up to \$500 per business is available on first-come first-served basis, until the available funds are spent.

### Rebate Requirements

1. **Provide Receipts:** Business will be reimbursed for a material expense or service expense. Copies of receipts must be provided.
2. **Measure is on the business' CAGBN checklist:** Expense must be a cost incurred that leads directly to a measure required for certification being completed.
3. **Business reached Participant Level:** Business must achieve the Participant Level, or higher, to be reimbursed for expense.
4. **Coordinator Verification:** The expense must be verified as meeting requirements 1-3 by a local Green Business Program Coordinator.
5. **Funds Available:** There are a limited number of rebates. They are first-come, first-served. Check with your coordinator to make sure there are funds available before incurring the expense.

### Reimbursement Information
