- All land area covered by all the structures on a site, including all projections, except portions of uncovered decks, porches, landings, balconies, or stairways that are less than six (6) feet above grade and are not enclosed by walls on more than two (2) sides; eaves; trellises or other structures that do not have solid roofs.
- Total horizontal area in square feet on each floor within and including the exterior walls of a structure but not including the area of inner courts, shaft enclosures, and mechanical equipment rooms.
- Any covered area below the first or main floor shall be included in the floor area if the average height of the perimeter is greater than 5 feet as measured from existing grade at the exterior to the top of existing finished floor of the story above. For structures on sloped lots, the average shall be taken at points where the interior space has a minimum 7.5-foot floor to ceiling height.
- Include if closed on three or more sides; a solid roof shall be counted as one side.
- Note: ADU square footage is included in FAR calculations for purposes of determining whether exceptional Design Review requirements apply to a project.
