

Proposed Amendments to the Environmentally Preferable Purchasing Policy:

July 2007

ENVIRONMENTALLY PREFERABLE PURCHASING

CITY OF ALBANY

1.0 STATEMENT OF POLICY

It is the policy of the City of Albany to:

- institute practices that reduce waste by increasing product efficiency and effectiveness,
- purchase products that minimize environmental impacts, toxics, pollution, and hazards to worker and community safety to the greatest extent practicable, and
- purchase products that include recycled content, are durable and long-lasting, conserve energy and water, use agricultural fibers and residues, reduce greenhouse gas emissions, use unbleached or chlorine free manufacturing processes, are lead-free and mercury-free, and use wood from sustainably harvested forests, **and**
- **purchase foods that are grown locally and without synthetic pesticides and fertilizers.**

2.0 PURPOSE

This Policy is adopted in order to:

- conserve natural resources,
- minimize environmental impacts such as pollution and use of water and energy,
- eliminate or reduce toxics that create hazards to workers and our community,
- support strong recycling markets,
- reduce materials that are landfilled,
- **reduce transportation and refrigerant sources of fossil fuels and greenhouse gas emissions,**
- increase the use and availability of environmentally preferable products that protect the environment,

- support local vendors to strengthen the regional economy and reduce dependence on distant resources that leave the community vulnerable to supply disruptions and fuel cost influxes,
- identify environmentally preferable products and distribution systems,
- reward manufacturers and vendors that reduce environmental impacts in their production and distribution systems or services,
- create a model for successfully purchasing environmentally preferable products that encourages other purchasers in our community to adopt similar goals.

3.0 SPECIFICATIONS

3.1 Source Reduction

- 3.1.1 City of Albany shall institute practices that reduce waste and result in the purchase of fewer products whenever practicable and cost-effective, but without reducing safety or workplace quality.
- 3.1.2 City of Albany shall purchase remanufactured products such as toner cartridges, tires, furniture, equipment and automotive parts whenever practicable, but without reducing safety, quality or effectiveness.
- 3.1.3 City of Albany shall require all equipment bought after the adoption of this policy to be compatible with source reduction goals as referred to in this section (3.1), when practicable.
- 3.1.4 All buyers shall consider short-term and long-term costs in comparing product alternatives, when feasible. This includes evaluation of total costs expected during the time a product is owned, including, but not limited to, acquisition, extended warranties, operation, supplies, maintenance, disposal costs and expected lifetime compared to other alternatives.
- 3.1.5 Products that are durable, long lasting, reusable or refillable are preferred whenever feasible.
- 3.1.6 City of Albany requests vendors to eliminate packaging or use the minimum amount necessary for product protection, to the greatest extent practicable.
- 3.1.7 Packaging that is reusable, recyclable or compostable is preferred, when suitable uses and programs exist.

- 3.1.8 Vendors shall be encouraged to take back and reuse pallets and other shipping and packaging materials.
- 3.1.9 Suppliers of electronic equipment, including but not limited to computers, monitors, printers, and copiers, shall be required to take back equipment for reuse or environmentally safe recycling when City of Albany discards or replaces such equipment, whenever possible.
- 3.1.10 City of Albany shall consider provisions in contracts with suppliers of non-electronic equipment that require suppliers to take back equipment for reuse or environmentally safe recycling when [organization] discards or replaces such equipment, whenever practicable.
- 3.1.11 All documents shall be printed and copied on both sides to reduce the use and purchase of paper, whenever practical.

3.2 Recycled Content Products

- 3.2.1 All products for which the United States Environmental Protection Agency (U.S. EPA) has established minimum recycled content standard guidelines, such as those for printing paper, office paper, janitorial paper, construction, landscaping, parks and recreation, transportation, vehicles, miscellaneous, and non-paper office products, shall contain the highest postconsumer content practicable, but no less than the minimum recycled content standards established by the U.S. EPA Guidelines.
- 3.2.2 Copiers and printers purchased shall be compatible with the use of recycled content and remanufactured products.
- 3.2.3 In accordance with California Public Contract Code, Sec. 10409, City of Albany shall purchase re-refined lubricating and industrial oil for use in its vehicles and other equipment, as long as it is certified by the American Petroleum Institute (API) as appropriate for use in such equipment.
- 3.2.4 When specifying asphalt concrete, aggregate base or portland cement concrete for road construction projects, City of Albany shall use recycled, reusable or reground materials when practicable.
- 3.2.5 City of Albany shall specify and purchase recycled content transportation products, including signs, cones, parking stops, delineators, channelizers and barricades, which shall contain the highest postconsumer content practicable, but no less than the minimum recycled content standards established by the U.S. EPA Comprehensive Procurement Guidelines.
- 3.2.6 All pre-printed recycled content papers intended for distribution that are purchased or produced shall contain a statement that the paper is recycled content. Whenever feasible, the statement should indicate the percentage of postconsumer recycled content it contains.

3.3 Energy and Water Savings

- 3.3.1 Where applicable, energy-efficient equipment shall be purchased with the most up-to-date energy efficiency functions. This includes, but is not limited to, high efficiency space heating systems and high efficiency space cooling equipment.
- 3.3.2 When practicable, City of Albany shall replace inefficient interior lighting with energy-efficient equipment.
- 3.3.3 When practicable, City of Albany shall replace inefficient exterior lighting, street lighting and traffic signal lights with energy-efficient equipment. Exterior lighting shall be minimized where possible to avoid unnecessary lighting of architectural and landscape features while providing adequate illumination for safety and accessibility.
- 3.3.4 All products purchased by City of Albany and for which the U. S. EPA Energy Star certification is available shall meet Energy Star certification, when practicable. When Energy Star labels are not available, the City shall choose energy-efficient products that are in the upper 25% of energy efficiency as designated by the Federal Energy Management Program.
- 3.3.5 City of Albany shall purchase water-saving products whenever practicable. This includes, but is not limited to, high-performance fixtures like toilets, low-flow faucets and aerators, and upgraded irrigation systems.

3.4 Green Building - Construction and Renovations

- 3.4.1 All building and renovations undertaken by City of Albany shall follow Green Building Practices for design, construction, and operation, where appropriate, as described in the LEEDTM Rating System.

3.5 Landscaping

- 3.5.1 All landscape renovations, construction and maintenance performed by City of Albany, including workers and contractors providing landscaping services for City of Albany, shall employ Bay-Friendly Landscaping or sustainable landscape management techniques for design, construction and maintenance whenever possible, including, but not limited to, integrated pest management, grasscycling, drip irrigation, composting, and procurement and use of mulch and compost that give preference to those produced from regionally generated plant debris and/or food waste programs.
- 3.5.2 Plants should be selected to minimize waste by choosing species for purchase that are appropriate to the microclimate, species that can grow to their natural size in the space allotted them, and perennials rather than annuals for color. Native and drought-tolerant plants that require no or minimal watering once established are preferred.
- 3.5.3 Hardscapes and landscape structures constructed of recycled content materials are encouraged. City of Albany shall limit the amount of impervious surfaces in the landscape, wherever practicable. Permeable substitutes, such as permeable asphalt or pavers, are encouraged for walkways, patios and driveways.

3.6 Toxics and Pollution

- 3.6.1 To the extent practicable, City of Albany shall purchase, or require janitorial contractors to supply, industrial and institutional cleaning products that meet Green Seal certification standards for environmental preferability and performance.
- 3.6.2 To the extent practicable, City of Albany shall purchase, or require janitorial contractors to supply, vacuum cleaners that meet the requirements of the Carpet and Rug Institute “Green Label” Testing Program – Vacuum Cleaner Criteria, are capable of capturing 96% of particulates 0.3 microns in size, and operate with a sound level less than 70dBA. Where possible and as applicable, other janitorial cleaning equipment shall be capable of capturing fine particulates, removing sufficient moisture so as to dry within 24 hours, operate with a sound level less than 70dBA, and use high-efficiency, low-emissions engines.
- 3.6.3 The use of chlorofluorocarbon and halon-containing refrigerants, solvents and other products shall be phased out and new purchases of heating/ventilating/air conditioning, refrigeration, insulation and fire suppression systems shall not contain them.
- 3.6.4 All surfactants and detergents shall be readily biodegradable and, where practicable, shall not contain phosphates.
- 3.6.5 When maintaining buildings and landscapes, City of Albany shall manage pest problems through prevention and physical, mechanical and biological controls. City of Albany may either adopt and implement an organic pest management policy and practices or adopt and implement an Integrated Pest Management (IPM) policy and practices using the least toxic pest control as a last resort.
- 3.6.6 When maintaining buildings, the City of Albany shall use products with the lowest amount of volatile organic compounds (VOCs), highest recycled content, and low or no formaldehyde when practicable when purchasing materials such as paint, carpeting, adhesives, furniture and casework.
- 3.6.7 City of Albany shall reduce or eliminate its use of products that contribute to the formation of dioxins and furans. This includes, but is not limited to:
- Purchasing paper, paper products, and janitorial paper products that are unbleached or that are processed without chlorine or chlorine derivatives, whenever possible.
 - Prohibiting purchase of products that use polyvinyl chloride (PVC) such as, but not limited to, office binders, furniture, flooring, and medical supplies whenever practicable.
- 3.6.8 City of Albany shall purchase products and equipment with no lead or mercury whenever possible. For products that contain lead or mercury, City of Albany shall give preference to those products with lower quantities of these metals and to vendors with established lead and mercury recovery programs.
- 3.6.9 City of Albany shall specify that desktop computers, notebooks and monitors purchased meet, at a minimum, all Electronic Product Environmental Assessment Tool (EPEAT)

environmental criteria designated as “required” as contained in the IEEE 1680 Standard for the Environmental Assessment of Personal Computer Products, whenever practicable

- 3.6.10 When replacing vehicles, City of Albany shall consider less-polluting alternatives to diesel such as compressed natural gas, biobased fuels, hybrids, electric batteries, and fuel cells, as available.
- 3.6.11 When purchasing foods and food products, City of Albany shall seek local and organic options that are produced without synthetic fertilizers and pesticides/herbicides.
- 3.6.12 When hiring or selecting a food service provider or caterer, City of Albany shall give preference to vendors that use local and organic ingredients. City of Albany shall adjust menu choices to be consistent with seasonal food options, as needed to allow local food sourcing.

3.7 Forest Conservation

- 3.7.1 To the greatest extent practicable, City of Albany shall not procure wood products such as lumber and paper that originate from forests harvested in an environmentally unsustainable manner. When possible, City of Albany shall give preference to wood products that are certified to be sustainably harvested by a comprehensive, performance-based certification system. The certification system shall include independent third-party audits, with standards equivalent to, or stricter than, those of the Forest Stewardship Council certification.
- 3.7.2 City of Albany encourages the purchase or use of previously used or salvaged wood and wood products whenever practicable.

3.8 Bio-Based Products

- 3.8.1 Vehicle fuels made from non-wood, plant-based contents such as vegetable oils are encouraged whenever practicable.
- 3.8.2 Paper, paper products and construction products made from non-wood, plant-based contents such as agricultural crops and residues are encouraged whenever practicable.
- 3.8.3 Bio-based plastic products that are biodegradable and compostable, such as bags, film, food and beverage containers, and cutlery, are encouraged whenever practicable.
- 3.8.4 Compostable plastic products purchased shall meet American Society for Testing and Materials (ASTM) standards as found in ASTM D6400-04. Biodegradable plastics used as coatings on paper and other compostable substrates shall meet ASTM D6868-03 standards.
- 3.8.5 Proof of compliance with ASTM standards for compostable, biodegradable and degradable plastic products shall be provided by vendors of such products, upon request. One acceptable proof of compliance for compostable plastic products will be certification by the Biodegradable Products Institute (BPI).

4.0 PRIORITIES

- 4.1 The health and safety of workers and citizens is of utmost importance and takes precedence over all other policies.
- 4.2 City of Albany has made significant investments in developing a successful recycling system and recognizes that recycled content products are essential to the continuing viability of that recycling system and for the foundation of an environmentally sound production system. Therefore, to the greatest extent practicable, recycled content shall be included in products that also meet other specifications, such as chlorine free or bio-based.
- 4.3 Nothing contained in this policy shall be construed as requiring a department, purchaser or contractor to procure products that do not perform adequately for their intended use, exclude adequate competition, or are not available at a reasonable price in a reasonable period of time.
- 4.4 Nothing contained in this policy shall be construed as requiring the City of Albany, department, purchaser or contractor to take any action that conflicts with local, state or federal requirements.

5.0 IMPLEMENTATION

- 5.1 The Community Development Department shall implement this policy in coordination with other appropriate City of Albany personnel.
- 5.2 As applicable, successful bidders shall certify in writing that the environmental attributes claimed in competitive bids are accurate. In compliance with State law, vendors shall be required to specify the minimum or actual percentage of recovered and postconsumer material in their products, even when such percentages are zero.
- 5.3 Upon request, buyers making the selection from competitive bids shall be able to provide justification for product choices that do not meet the environmentally preferable purchasing criteria in this policy.
- 5.4 Purchasers shall include businesses certified by the Bay Area Green Business Program in requests for products and services.
- 5.5 Vendors, contractors and grantees shall be encouraged to comply with applicable sections of this policy for products and services provided to the City of Albany, where practicable.

6.0 PROGRAM EVALUATION

- 6.1 The Community Development Department shall periodically evaluate the success of this policy's implementation.

7.0 DEFINITIONS

- 7.1 “American Society for Testing and Materials” means ASTM International, an open forum for the development of high quality, market relevant international standards use around the globe.
- 7.2 “Bay Area Green Business Program” is a partnership of governments and businesses that certifies the environmental performance of government agencies and businesses.
- 7.3 “Bay-Friendly Landscaping” means working with the natural ecosystems of the San Francisco Bay Area to foster soil health, to reduce runoff and pollution, prevent and reuse plant waste, conserve water and other natural resources. Bay-Friendly Landscaping practices are described in the *Bay-Friendly Landscape Guidelines*, by StopWaste.Org.
- 7.4 “Bio-Based Products” means commercial or industrial products (other than food or feed) that utilize agricultural crops or residues but does not include products made from forestry materials.
- 7.5 “Biodegradable plastic” means the degradation of the plastic must occur as a result of the action of naturally occurring microorganisms.
- 7.6 “Biodegradable Products Institute” (BPI) is a multi-stakeholder association of key individuals and groups from government, industry and academia, which promotes the use, and recycling of biodegradable polymeric materials (via composting). BPI does not create standards but certifies products that demonstrate they meet the requirements in ASTM D6400 or D6868, based on testing in an approved laboratory.
- 7.7 “Buyer” means anyone authorized to purchase or contract for purchases on behalf of City of Albany or its subdivisions.
- 7.8 “The Carpet and Rug Institute” (CRI) is the national trade association representing the carpet and rug industry. CRI has developed and administered the “Green Label” indoor air quality testing and labeling program for carpet, adhesives, cushion materials and vacuum cleaners. The “Green Label Plus” testing program incorporates additional requirements to meet California’s Collaborative for High Performance Schools low-emitting materials criteria.
- 7.9 “Chlorine free” means products processed without chlorine or chlorine derivatives.
- 7.10 “Compostable plastic” means plastic that is biodegradable during composting to yield carbon dioxide, water and inorganic compounds and biomass, at a rate consistent with other known compostable materials and leaves no visually distinguishable or toxic residues.
- 7.11 “Contractor” means any person, group of persons, business, consultant, designing architect, association, partnership, corporation, supplier, vendor or other entity that has a contract with City of Albany or serves in a subcontracting capacity with an entity having a contract with City of Albany for the provision of goods or services.
- 7.12 “Degradable plastic” means plastic that undergoes significant changes in its chemical structure under specific environmental conditions.

- 7.13 “Dioxins and furans” are a group of chemical compounds that are classified as persistent, bioaccumulative, and toxic by the Environmental Protection Agency.
- 7.14 “Energy Star” means the U.S. EPA’s energy efficiency product labeling program.
- 7.15 “Energy Efficient Product” means a product that is in the upper 25% of energy efficiency for all similar products, or that is at least 10% more efficient than the minimum level that meets Federal standards.
- 7.16 “Electronic Product Environmental Assessment Tool” (EPEAT) is a procurement tool to help institutional purchasers in the public and private sectors evaluate, compare and select desktop computers, notebooks and monitors based on their environmental attributes.
- 7.17 “Federal Energy Management Program” is a program of the Department of Energy that issues a series of *Product Energy Efficiency Recommendations* that identify recommended efficiency levels for energy-using products.
- 7.18 The “Forest Stewardship Council” is a global organization that certifies responsible, on-the-ground forest management according to rigorous standards developed by a broad variety of stakeholder groups.
- 7.19 “Green Building Practices” means a whole-systems approach to the design, construction, and operation of buildings and structures that helps mitigate the environmental, economic, and social impacts of construction, demolition, and renovation. Green Building Practices such as those described in the LEEDTM Rating System, recognize the relationship between natural and built environments and seeks to minimize the use of energy, water, and other natural resources and provide a healthy productive environment.
- 7.20 “Green Seal” is an independent, non-profit environmental labeling organization. Green Seal standards for products and services meet the U.S. EPA’s criteria for third-party certifiers. The Green Seal is a registered certification mark that may appear only on certified products.
- 7.21 “Integrated Pest Management (IPM)” is an ecosystem-based strategy that focuses on long-term prevention of pests or their damage through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and use of resistant varieties. Pesticides are used only after monitoring indicates they are needed according to established guidelines, and treatments are made with the goal of removing only the target organism. Pest control materials are selected and applied in a manner that minimizes risks to human health, beneficial and nontarget organisms, and the environment.
- 7.22 “LEEDTM Rating System” means the most recent version of the Leadership in Energy and Environmental Design (LEEDTM) Commercial Green Building Rating System, or other related LEEDTM Rating System, approved by the U.S. Green Building Council and designed for rating new and existing commercial, institutional, and high-rise residential buildings.

- 7.22a “Local” food products are those produced as close to Albany as possible, within 250 miles.
- 7.22a “Organic” or “organically produced” means produced in compliance with standards set forth by certification bodies that include criteria of non-toxic, non-synthetic fertilizers and pesticides. Standards of United States Department of Agriculture (USDA; www.usda.gov), California Certified Organic Farmer (CCOF), and (Organic Materials Review Institute (OMRI) are recognized standards for “organic”. USDA is the federal authority on agricultural standards and regulations. CCOF is a certification body for producers of organic foods. CCOF standards are similar to USDA standards. They also offer certification for meeting international organic standards. OMRI provides organic certifiers, growers, manufacturers, and suppliers an independent review of products intended for use in certified organic production, handling, and processing. A detailed explanation of organic production practices that are consistent with USDA certification requirements may be provided by non-certified vendors as a substitute for certification.
- 7.23 “Organic Pest Management” prohibits the use and application of toxic chemical pesticides and strives to prevent pest problems through the application of natural, organic horticultural and maintenance practices. All pest control products shall be in keeping with, but not limited to, those products on the approved list of California Certified Organic Foods (CCOF).
- 7.24 "Postconsumer Material" means a finished material which would normally be disposed of as a solid waste, having reached its intended end-use and completed its life cycle as a consumer item, and does not include manufacturing or converting wastes.
- 7.25 “Practical” and “Practicable” mean whenever possible and compatible with local, state and federal law, without reducing safety, quality, or effectiveness and where the product or service is available at a reasonable cost in a reasonable period of time.
- 7.26 “Preconsumer Material” means material or by-products generated after manufacture of a product is completed but before the product reaches the end-use consumer. Preconsumer material does not include mill and manufacturing trim, scrap, or broke which is generated at a manufacturing site and commonly reused on-site in the same or another manufacturing process.
- 7.27 “Recovered Material” means fragments of products or finished products of a manufacturing process, which has converted a resource into a commodity of real economic value, and includes preconsumer and postconsumer material but does not include excess resources of the manufacturing process.
- 7.28 “Recycled Content” means the percentage of recovered material, including preconsumer and postconsumer materials, in a product.
- 7.29 “Recycled Content Standard” means the minimum level of recovered material and/or postconsumer material necessary for products to qualify as “recycled products.”
- 7.30 “Recycled Product” means a product that meets City of Albany’s recycled content policy objectives for postconsumer and recovered material.

- 7.31 “Remanufactured Product” means any product diverted from the supply of discarded materials by refurbishing and marketing said product without substantial change to its original form.
- 7.32 “Reused Product” means any product designed to be used many times for the same or other purposes without additional processing except for specific requirements such as cleaning, painting or minor repairs.
- 7.32a “Seasonal” produce includes crops that grow in outdoor, unregulated circumstances within the specific region. A list of seasonal crops for the Northern California region is available at <http://www.ferryplazafarmersmarket.com/seasonality/charts/vegetable.php>
- 7.33 “Source Reduction” refers to products that result in a net reduction in the generation of waste compared to their previous or alternate version and includes durable, reusable and remanufactured products; products with no, or reduced, toxic constituents; and products marketed with no, or reduced, packaging.
- 7.34 “U.S. EPA Guidelines” means the Comprehensive Procurement Guidelines established by the U.S. Environmental Protection Agency for federal agency purchases as of May 2002 and any subsequent versions adopted.
- 7.35 “Water-Saving Products” are those that are in the upper 25% of water conservation for all similar products, or at least 10% more water-conserving than the minimum level that meets the Federal standards.

8.0 EFFECTIVE DATES

- 8.1 This policy shall take effect on August 1, 2007.
- 8.2 The amendments to this policy regarding food products shall take effect on August 1, 2009.
